

SPEEDYCast

- Collaborative tool for managing language voice talent selection
- Hierarchical creative review and approval
- Stand-alone or integrated with SPEEDYDub and SPEEDYAssets for end-to-end localization project management
- Cloud-based, global, collaborative

SPEEDYDub

- Project planning, execution and task collaboration across departmental and organizational boundaries
- Integrated with SPEEDYCast and SPEEDYAssets
- Automated Task management
- Automatically notifies users when Tasks are assigned and completed, reducing confusion and wasteful communications

SPEEDYAssets

- Link Language Assets with the Language Projects they support, reducing mistakes and clutter
- Users upload completed assets directly to Project
- User account and role-based file access for increased security
- Log and monitor uploads and downloads
- Disable/enable downloads on a user account basis

Empower • Accelerate • Collaborate • Automate

The BENEFITS of SPEEDY Collaboration

- Manage global, multi-tenant localization Projects across suppliers
- Integrate Projects, Schedules, Tasks and Technical Materials in one location for optimal efficiency and security
- Accelerate productivity and product flow
- Reduce emails, mistakes and confusion
- Promote Teamwork, Organization and seamless Collaboration
- Replace spreadsheets and email as management tools
- Promote transparency and accountability
- Close regional communication gaps
- Increase capacity with current headcount
- Reduce middle management participation and automate work normally delegated to staff

SpeedySuite is the only Localization solution that integrates Voice Casting, Production and Asset Management into a single, secure, scalable and automated Cloud-based tool from Creative to Delivery
